The World Health Collaboration Centre for Obesity Prevention was designated by the Director-General of WHO to undertake research, train and educate other professionals and provide expert advice to WHO and Member States on obesity-related matters

WHO Collaborating Centre
for Obesity Prevention

About this course

Using the latest evidence, this course will provide participants with:

- an enhanced understanding of the obesity epidemic and associated burden of disease
- frameworks to understand the determinants of obesity
- best practice principles for community-based obesity prevention
- tools for building obesity prevention initiatives
- skills to collect, synthesise and understand evidence

Who should attend?

The course is designed for managers and practitioners working in physical activity and/or nutrition promotion including staff from the fields of health promotion, community health and public health including GPs, dietitians, nurses, teachers, physical activity practitioners, government staff and others working/interested in the area of physical activity, nutrition and the promotion of healthy weight. The course will also be valuable for academics and researchers working at the intersection of research and practice.
